Delivery Map

Customer Name:_____

The key to a safe and smooth delivery is planning. If you are purchasing product from CDI, we ask that you provide a hand-drawn map to identify particular hazards associated with your job site.

Keep in mind that semi-tractors cannot maneuver in tight areas such as cul-de-sacs, step inclines, or narrow bridges. Some areas have restrictive ordinances or require permits. We need to know these details. CDI will provide the driver with computer map sheets to supplement the hand drawn maps.

Please complete this detailed map sheet and return this to CDI. It will take a couple of minuets but could save you hours of time and frustration as well as money.
